

INSTALLATION PROCEDURE OF AEBAS

System Requirements:

- Window 7.0 (32 bit version) for better result.
- Dotnet 4.5

Procedure:

If dotnet4.5 is not available then download it from Visakhapatnam.nic.in> Aadhaar Biometric Attendance System. Install it and restart the system.

Download BAS s/w and unzip it. Now run the BAS3.5 or 4.0 as administrator and follow the steps. Connect the IRIS or Finger print device. Update the drivers from My Computer> right click >select Manage> Device Manger> select the device and update the drivers by browsing C:\FingerprintSensors\Drivers.

Now restart the system.

From the attendance website <http://apdmhovskp.attendance.gov.in/> or <http://apcovskp.attendance.gov.in/> after login, In manage masters Create division/units, Office locations and device locations. Now from Manage device create the biometric admin and activation code. Click the BAS icon the desktop, for the first time select the domain name from the list, submit the activation code, verify the location and authenticate with biometric admin iris or finger prints. Now the system is ready within the device location.

To enter the Biometric attendance, enter the last 8 digits of the aadhaar number and confirm the IRIS or finger prints. It will be authenticated from the UID Server and the attendance will be marked.
